

Dental Training Ltd

Forensic Odontology

PROSPECTUS

This course is something different and not for the faint hearted as it contains graphic images – something that most dental nurses love!

The course covers the following:

- What happens to the body during decomposition
- How ascertain the approximate timing of death
- The importance of identifying a body
- How we can identify a body from the dentition
- How a person is identified in a mass disaster
- The bite mark scale
- Famous cases

2 hours of enhanced CPD
